## Problem Definition

Having read the project specifications, our team members realize that there are problems and difficulties which may interfere the users' experience. In order to make the most precise decision and look for the best solution to tackle this, each developer has to consider the following queries thoroughly:

- 1) How many songs do we need on the web page?
- 2) How many singer need to show?

<b>Effective Date:</b> 12-11-18	<b>Version</b> 1.0	<b>Page No:</b> 7 of 24

- 3) What information should be displayed on the homepage?
- 4) How can the users interact with the website?
- 5) How many genres do we need?

The website is to be developed for the Windows Platform using HTML5, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox etc.
